

EASY ACCESS

Vacation Rental Guests are demanding convenience in the properties they choose to vacation at.

NO MORE KEYS

Keyless entry has become an amenity in the industry that guests now expect.

STAYING UP TO DATE

Making this move allows us, you, and our guests to stay current with market trends.

INTRODUCING KEYLESS ENTRY

We are rolling out keyless entry at the properties that we manage. Existing access control methods include guests picking up keys at a central office. This can be difficult because it may be a location on the other side of town. Limited open office hours can turn into conflict when unforeseen schedule changes occur including flight delays and more. Lockboxes are sometimes installed at a property, but they are difficult to locate and use in the dark and offer poor management and oversight.

The **greatest** advantage for the guest is that they can enter a property and begin their vacation without having to worry about keys.

Management will be able to remotely check if the door is locked at any given property to ensure **security**.

Unique lock codes are automatically generated for each booking and are only active on the lock during the guest's reservation.

With this solution, there is no need for lockboxes or expensive rekeying costs. Guests leave feeling **happier** with the new and improved service.

BEFORE

PICKING UP KEYS

- ✘ Guests travel out of the way to get keys
- ✘ After hours key pickup is tricky & insecure

LOCKBOXES

- ✘ Can be difficult to find
- ✘ Difficult to operate in the dark
- ✘ Many lockboxes are different and take time to figure out

SHARING KEYS

- ✘ One (or two) set of keys is difficult for a guest group to manage
- ✘ Guests have to coordinate who has the keys and who is arriving back at the property first which makes it is easy to get locked out

POOR SECURITY

- ✘ How many copied keys are out in the world or lost all together?
- ✘ How often are locks re-keyed?
- ✘ Doors are left unlocked and keys left under the mat by guests for convenience

AFTER

NO NEED TO PICK UP KEYS

- ✔ Guest gets emailed with their unique door code before their trip

NEW LOCK CODES

- ✔ Access becomes active at the start of the reservation
- ✔ Guest code expires at the end of the reservation
- ✔ Guests enters a code in the key pad in order to unlock the door
- ✔ Check-in time is logged and the main office is notified

SHARED ACCESS

- ✔ Guests can share access to everyone in their group by sharing the combination code
- ✔ This is a universal solution that is easy for guests to manage

GREATER SECURITY

- ✔ No keys to loose
- ✔ No need to rekey locks
- ✔ All entries and exits are logged including management staff
